### 教學綱要

一、教學目標

This course will teach you to learn how to make sound financial decisions in the multinational firm context. This course also provides a clear conceptual framework for analyzing key financial decisions in multinational firms—a framework that you can rely on throughout your career. Every student will learn about:

1. keep up with current financial events around the globe.
2. make smart decisions.
3. learn how to take advantage of being multinational.
4. examine real international financial problems.

二、先修科目

The basic thrust of this course is to provide a conceptual framework within which the key financial decisions of the multinational firm can be analyzed. The approach is to treat international financial management as a natural and logical extension of the principles learned in the foundations course in financial management. This course builds on and extends the valuation framework provided by domestic corporate finance to account for dimensions unique to international finance. MFM focuses on decision making in an international context. All the traditional areas of corporate finance are explored, including working capital management, capital budgeting, cost of capital, and financial structure.

This course will teach you to learn how to make sound financial decisions in the multinational firm context. This course also provides a clear conceptual framework for analyzing key financial decisions in multinational firms—a framework that you can rely on throughout your career. Every student will learn about:

1. keep up with current financial events around the globe.
2. make smart decisions.
3. learn how to take advantage of being multinational.
4. examine real international financial problems.
