Synergy cup

Contents
In the winter people like to make hot tea however it is not easy to finish it at once. However, if you do not know the drink is already cold. Therefore, this cup design contains the temperature display function that can avoid such problem. Furthermore, this cup also takes weight of the contents into account. There are two handles designed in this cup: one fixed and the other is active. When weight is heavily or loading hot drinks, the handles can be separated into two parts.

Features
1. In accordance with the weight of the load in the Cup, the handle of the cup is adjustable.
2. Lateral cup can show temperature of the liquid in the cup. When the weather is cold, it can prevent users from drinking the cool off drinks.
