IS YOUR RULER LONG ENOUGH?

Common ruler

RUUULER
Using special material and flip simply can draw infinitely straight long line.

If you use normal ruler, after you draw 15cm, you want to draw next 15cm you need to reset on the end of the line. But with RUUULER, this can be avoided. Using RUUULER, you can draw 15cm, and it will show you’re still drawing next 15cm. It is very useful in drawing long lines.
